

## Lancashire Resource Efficiency Club

We \_\_\_\_\_ agree to participate in the Lancashire Resource Efficiency Club and initially provide baseline data on our resource usage.

We agree to furnish progress updates of the resource efficiency data within

- a. 6 months or by 28th July 2006 whichever is the sooner and
- b. 12 months or by 29th January 2007 whichever is the sooner.

Where data initially provided is estimated we will endeavour to provide accurate figures to enable real comparison in the second and third stage updates.

The Lancashire Business Environment Association will signpost and provide support opportunities as deemed appropriate to aid delivery of improvements in resource efficiency throughout the three stages of the programme. This may include some or all of the following:

- on site consultation on resource efficiency,
- support with data identification and mapping,
- waste minimisation seminars,
- Envirowise and Carbon Trust publications, websites and fast track visits/site surveys
- ENWORKS Resource Efficiency Programme / Business Environment Association.
